Skylibot - Smart Telegram News Bot

Skylibot is a fully automated Telegram bot that publishes news every 30 minutes with a short annotation, image, and buttons.

Features:

- Automatic posting every 30 minutes

- GPT-based or fallback template annotations

- Image generation via og:image or Unsplash

- Multi-channel support

- Styled posts: emoji, buttons, media layout

- /update command and logging

Installation:

1. Install requirements from requirements.txt

2. Create .env file with:

   BOT_TOKEN=...

   CHAT_IDS=@channel1,@channel2

   CHANNEL_NICK=@skylibot

3. Run the bot:

   python main.py

Deployment:

Recommended platforms: Railway, Render, or your own VPS.

.env examples and detailed steps are in the README.md

Ready to use and extend.
